CMS-IP Call Management Software for L7700 IP Power Supply

The CMS-IP software is used in conjunction with the **L7700 IP Controller** and displays real time information from the call system. The CMS IP software interfaces directly with the TCP/IP LAN (Local Area Network) and may be installed on several computers simultaneously on the same LAN. CMS-IP does not require any complicated Com port setup or Importing of Room Text Data or Users as the information is automatically received over the Network. All of the events are stored inside the L7700 IP Controller, so the PC does not even need to be switched on in order to record system activity. With the use of an additional IP L7744 interface, free text messages may be sent to Message Pagers and DECT telephone handsets.

The screenshot shows the CMS-IP software window. The title bar says 'CMS-IP'. The menu bar includes 'File', 'View', 'Action', and 'Help'. The toolbar has icons for 'Print', 'Options', 'Pager Messaging', 'Data Analysis', and a help icon. The main header area displays 'INTERCALL' and 'NURSECALL SYSTEMS' on the left, and 'Call Management System' on the right. Below this is a tabbed interface with 'Active Events' selected. The table below lists call events with columns for Timestamp, Event, Channel, Resident, and Area.

Timestamp	Event	Channel	Resident	Area
08/03/2011 19:58:20	Call	HOUSE BLOCK A	-	LEVEL 2 CELL 5
08/03/2011 19:58:20	Reset	HOUSE BLOCK A	-	LEVEL 2 CELL 4
08/03/2011 19:58:12	Call	HOUSE BLOCK A	-	LEVEL 2 CELL 4
08/03/2011 19:58:12	Reset	HOUSE BLOCK A	-	LEVEL 1 CELL 2
08/03/2011 19:58:05	Call	HOUSE BLOCK A	-	LEVEL 1 CELL 2
08/03/2011 19:58:05	Reset	HOUSE BLOCK A	-	LEVEL 1 CELL 2
08/03/2011 19:57:58	Call	HOUSE BLOCK A	-	LEVEL 1 CELL 2
08/03/2011 19:57:58	Reset	HOUSE BLOCK A	-	LEVEL 1 CELL 2
08/03/2011 19:57:51	Call	HOUSE BLOCK A	-	LEVEL 1 CELL 2
08/03/2011 19:57:50	Reset	HOUSE BLOCK A	-	LEVEL 1 CELL 2
08/03/2011 19:57:43	Call	HOUSE BLOCK A	-	LEVEL 1 CELL 2
08/03/2011 19:57:43	Reset	HOUSE BLOCK A	-	LEVEL 1 CELL 2

The CMS Lite software connects to the same Local Area Network as the L7700 **L7700 IP Controller**. With the use of an additional IP L7744 interface, free text messages may be sent to Message Pagers and DECT telephone handsets. A typical installation is shown below. The software is licensed for use on any number of computers on the same Local Area Network.
